Digital Literacy Portfolio – Student Digital Ambassador

Name: Kartik Mathur
Registration Number: 2B0E10113
Course: CSE0001 – Digital Literacy

Introduction

This Digital Literacy Project was completed as part of the CSE0001 course to develop essential skills required in the digital world. The project is based on the role of a Student Digital Ambassador, whose responsibility is to guide others in using digital tools safely and effectively.

The project includes five different tasks, each focusing on an important aspect of digital literacy such as awareness, professional communication, coding platforms, and online safety. Through this project, I learned how to use digital platforms responsibly and build a professional online presence.

Task 1: Digital Literacy Awareness Info graphic

In this task, I created an info graphic on the topic “Digital Literacy Awareness” using Canva. The info graphic included key sections such as the meaning of digital literacy, safe internet practices, useful digital tools, and its importance in today’s world.

While designing the info graphic, I focused on keeping the content simple, clear, and visually attractive by using icons, proper layout, and readable text. This task helped me improve my creativity and understand how to present information effectively.

Task 2: Building a Digital Portfolio

In this task, I created and developed my digital portfolio by setting up profiles on Git Hub, LinkedIn,. Git Hub helped me understand how to manage projects and showcase my work. LinkedIn allowed me to build a professional profile, This task helped me understand the importance of building a digital identity and maintaining a strong online presence for future academic and career opportunities.

Task 3: Exploring Digital Platforms and Tools

In this task, I explored different digital platforms to enhance my technical skills. I used Hacker Rank to solve a basic coding problem, which helped me develop logical thinking and problem-solving skills.

I also created a Google Form quiz on digital literacy, which helped me learn how to design forms, collect responses, and manage data effectively. This task improved my understanding of how digital platforms can be used for collaboration and learning.

Task 4: Email Etiquette and Social Media Responsibility

In this task, I learned the importance of professional communication through email and responsible behaviour on social media. I wrote two formal emails, one requesting an assignment extension and another applying for an internship.

I also created a checklist of social media do’s and don’ts. This task helped me understand how proper communication and responsible online behaviour create a positive impression and avoid misunderstandings.

Task 5: Cybercrime Awareness and Online Safety

In this task, I studied cybercrime through a phishing case related to online banking fraud. I learned how cybercriminals use fake messages and links to trick users into sharing sensitive information.

I also created a prevention checklist to promote safe online practices such as avoiding suspicious links, using strong passwords, and not sharing personal details. This task increased my awareness of online risks and the importance of digital safety.

Conclusion

This Digital Literacy Project helped me understand the importance of using digital tools effectively and responsibly. Through different tasks, I learned how to create informative content, build a professional online presence, and communicate properly using emails.

The project also increased my awareness of cybercrime and online safety. Overall, it improved my digital skills and prepared me to use technology confidently in my academic and professional journey.
